Note: Net assets for the first quarter and full year of FY2005 do not include minority interests.

3. Projected results for FY2006 (April 1, 2006 to March 31, 2007)

Since first-quarter results were close to initially projected results (forecast announced on May 12, 2006), initial FY2006 interim and full-year forecasts announced with FY2005 results (for the fiscal year ended March 31, 2006) remain the same. Earnings per share take into consideration the reduced yearly average number of shares accompanying the reacquisition of treasury stock during the first quarter.

	Net sales	Ordinary income	Net income
	¥ millions	¥ millions	¥ millions
FY2006 interim	83,000	4,100	2,700
FY2006 full-year	174,400	10,400	8,400

(Ref.) Projected earnings per share (full-year): ¥39.04

The above projections are based on business conditions as of the publish date of this report.

Actual results could differ from projections due to changes in business conditions and other factors.

Review of Operations (for the Three Months Ended June 30, 2006)

During the first quarter of the current fiscal year (April 1, 2006 to June 30, 2006), the Japanese economy advanced steadily with an aggressive expansion in capital investment and a recovery in consumer spending. However, the retail industry, including department stores and general merchandizing stores, experienced slow sales due primarily to unseasonable weather from April through May. Faced with these continued challenges, the Gunze Group made aggressive capital investments in high-growth fields, while also developing highly distinguished products and technologies. Efforts were also concentrated on promoting cost reductions and strengthening comprehensive approaches for clients. As a result, the Gunze Group's consolidated net sales for the period under review totaled ¥40,086 million, or a year-over-year decrease of 0.1%. Operating income declined 3.1% to ¥2,156 million. Ordinary income, however, rose 1.0% to ¥2,435 million. Consolidated net income was ¥2,270 million, or a year-over-year increase of 64.7%. This was mainly due to the posting of an amortization gain of ¥1,786 million arising from unrecognized net actuarial gains related to retirement benefit obligations. Net sales and operating income by business segment during the period under review are listed below.

[Apparel]

Operating income declined 8.2% year over year to ¥1,313 million on a decrease of 3.9% in net sales to ¥23,771 million.

Men's and Kids' Wear Company

In men's innerwear, unseasonable weather conditions in April and May slowed store sales. Although "Cool Biz"-related items and other seasonal products enjoyed sales growth over the same period of the previous year, the *GAIA*-category of innerwear brands centering on *BODY WILD* and the "Friendly" category products suffered declining sales. Consequently, the Men's and Kids' Wear Company posted a decrease in both revenues and profits.

Ladies' and Leg Wear Company

In women's innerwear, the *Flaty* campaign helped drive sales up for new innerwear

products such as *CFA100* and *Yasashisa Monogatari*, and *BODY WILD* and other casual wear products. By contrast, basic product sales were sluggish, which resulted in an overall revenue decline. In lingerie and foundation garments, the core brand *Tuché* performed strongly. However, *Yansoffi* and *Iineno Tsuikyū* posted disappointing sales. In the stockings category, patterned stockings and the *STYLISH PANTS*, a new category item, enjoyed increased sales. Overall, the Ladies' and Leg Wear Company recorded a decrease in both revenues and profits.

Other Textiles

In the home casual (pajamas) category, sleepwear products recorded a year-over-year sales rise thanks to successful “Mother’s Day” and “Father’s Day” promotions. Home wear product sales, however, were disappointing due to slow market conditions for spring-season products. Consequently, this category posted a decrease in both revenues and profits. In textile materials, industrial machine-sewing threads suffered disappointing sales in Japan and China. However, accessories and auxiliary materials recorded strong sales, which helped boost overall revenues for this category, although profits posted a slight decline.

[Functional Solutions]

Net sales increased 2.5% year over year to ¥13,313 million and operating income rose 7.8% to ¥1,544 million.

Plastic Film Company

The plastic film industry, in which Gunze is involved, faces increasingly intensified competition along with the maturity of the beverage market. Despite this tough challenge, new high-performance products made a significant contribution to sales increases, and exports also remained strong. Gunze was also able to pass on material cost increases to sales prices of its products. These factors allowed both revenues and profits to remain nearly on par with the levels recorded during the same period of the previous year. Overseas operations in the United States and Europe also began to see enhanced profitability and other productive effects of the technical assistance from Japan, as well group-wide efforts to spur improvements. Partly due to increased burdens caused by depreciation, the Plastic Film Company posted decreased profits with a slight

decline in revenues.

Engineering Plastics

As for the office equipment industry as a whole, color multifunction peripherals (MPFs) are showing especially remarkable growth. This helped mainstay CA belts (high-performance polyimide resin belts for color photocopiers and printers) continue to perform impressively. Sales for fluorocarbon resin thin-walled tubing for fixation rollers also advanced steadily, with overseas sales also being strong. Increased depreciation expenses accompanying equipment upgrades dragged down the overall profits for this category, despite a year-over-year increase in revenues.

Electronic Components

Gunze proprietary high-performance touch panels for video applications and mid-/large-sized touch panels for notebook PCs and handy terminals continued to be popular, resulting in significant sales growth year over year. Sales promotions for the touch panel-based LCD product also advanced steadily, with its first employment as an in-store POS system in Europe. Overall, the electronic components category recorded year-over-year increases in revenues and profits.

Others

Although sales for food processing and pharmaceuticals/packaging-related machinery were strong, printing press-related machinery experienced sluggish sales, which in turn dragged down overall revenues and profits in this category. Sales expansion for bone fixation materials and artificial dermis proved effective, contributing to overall increases in revenues and profits for medical materials.

[Lifestyle Creations]

Net sales rose 21.1% year over year to ¥3,376 million and operating income rose 184.0% to ¥142 million.

The grand opening of the *Gunze Town Center TSUKASHiN* at the end of April significantly contributed to growth in the real estate business. Since its opening, this new shopping center, with its firm roots in the local community, has enjoyed a great

deal of popularity. As a result, overall real estate revenues and profits increased. In sports facility management, a new sports club opened at Kurashiki Ivy Square in April and at Port Wave Nishinomiya in June. Gunze also initiated entrusted management for the *Nionohama Fureai Sports Center* in Otsu City commissioned by the municipal government in April. Overall, sports facility management posted an increase in revenues, albeit with decreased profits.

Outlook for FY2006

As the consolidated results for the first quarter nearly reached the company's initial targets, Gunze has not revised its half-year and full-year forecasts announced previously on May 12, 2006.
