NEO VEIL Sheet-Type is to reinforce soft tissues and or to prevent air leakage. Suture it or stick it with fibrin glue to the applied part.

**Typical use of NEOVEIL Sheet-Type and fibrin glue (Spray-Rub method)**

1. Spray fibrinogen to the applied part.
2. Rub fibrinogen into the tissues firmly.
3. Attach NEOVEIL onto the part where rubbed fibrinogen.
4. Carry out the mixed spray of fibrinogen and thrombin together.
5. Wait for 5 to 10 minutes.
6. Complete.
