

Compositions of thinner pinhole-resistant tube FS35

1. Layer structure

2. Product features

① Reducing plastic waste

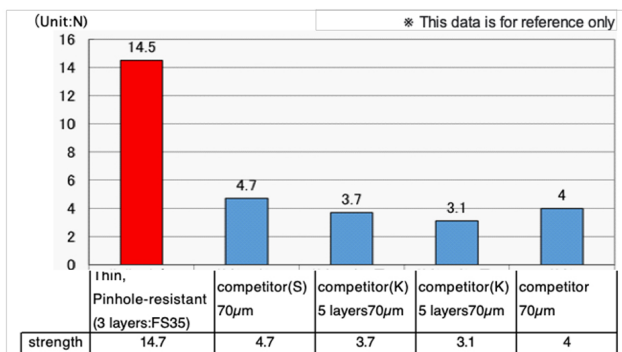

By the volume reduction of plastic to 35µm

Compared to the competitor films whose thickness is 70µm,
50% reduction

② Thin film with puncture strength

Puncture strength comparison (compare with competitor film: Ny/Pe 70µm)

Compared to the competitor films whose thickness is 70µm,
4 times improvement

③ Maintains strengthening even under freezing

Item	GUNZE	competitor(S)	competitor(K)		competitor

Bending resistance pinhole (Gelbo test) -25°Cx1000times	0, 0, 0 pcs	36, 48, 34 pcs	50, 47, 39 pcs	46, 47, 40 pcs	46, 47, 50 pcs
Friction resistance load200g 0.5Rneedle	100 times more	once	twice	once	twice

Improvement Bending abrasion and Pinhole

3. Standard and Application

■ Standard:

Thickness (µm)	35	Lay flat (mm)	100~350
----------------	----	---------------	---------

※You can use in bag with bottme seal. The length is available upon requests.

■ Application: For packaging food for business use of cold chain, packaging in backyard and vaccume packaging of intermediate food

Processed food with seasoning liquid, Frozen meat, Fried chicken dumplings, Fish fillet, Sushi topping, Meal-Kit, Side dish, fruit
※not only plane bags but also printing is possible!
